**Taking a Test**

**WAKE UP:** The unit will wake up and alert you with several beeps when you are required to take a test.

**BLOW:** The unit is ready to accept a breath test. **PICK UP THE ENTIRE Unit – HANDSET AND BASE.** Blow into the unit for about 5 seconds until you hear a beep. The screen will say "WAIT".

**PASS:** You have passed the test and the screen will display your next test time. This could be an exact time or a time range.

**FAILED:** You have failed the test. The screen will say "WAIT" while the unit resets to allow you to take a retest. The screen will count down the number of seconds you have to wait.

**Note:** Trace amounts of alcohol can give a positive reading. To avoid this, follow these guidelines:
- Don’t eat or drink five minutes before testing
- Rinse your mouth with water before taking a test
- Ensure proper ventilation

**May Contain Alcohol (this list is not all inclusive)**
- Hand Sanitizer
- Antibacterial Soap
- Mouthwash
- Hot Sauce
- Sugarless Gum
- Household Products (air fresheners, bleach, laundry detergent, glue)
- Hygiene Products (deodorant sprays, aftershave, perfume, toothpaste, insect repellent)
- Medicines and Inhalers
- Energy Drinks
- Fruit, Bread, Pizza
- E-cigarettes

**RETEST:** The screen will display **BLOW**. The unit is ready to accept a breath test*. The screen will display FAILED or PASS depending on the outcome of the test. The Screen will display your next test time.

**Required Monitoring Appointments**

When you receive your Mobile Monitoring Unit, a service appointment will be made for you. This is typically 30 days or less from the date of receipt and every 30 days thereafter until the end of your program. During this appointment the unit’s memory will be downloaded and analyzed. Results of breath tests, violations and other data will be reported to your monitoring authority. The service provider will inspect the unit for signs of any attempted tampering and, if discovered, this will be reported as well. The unit will also be calibrated, inspected for proper functioning and your next payment will be collected.

You must call **24 hours in advance** to change a scheduled monitoring appointment. Failure to do so will result in a Missed Appointment Fee.

**Warning:** If you miss a scheduled monitoring appointment or fail to respond to an early recall, a non-compliance report will be sent to authorities.

---

*The number of and /or time allowed for retests will vary by jurisdiction and is determined by your monitoring authority.*
Mobile Monitoring Unit®
Quick Reference Guide

This guide explains the use of the LifeSafer Mobile Monitoring Unit (MMU). You will be enrolled into a Sobriety Program and trained on proper use of the LifeSafer Mobile Monitoring Unit. A schedule of test times will be established by your monitoring authority and provided with this handbook. You may also be required to take random tests throughout the day. You will be required to have the unit serviced periodically. A date will be programmed into the unit telling you when you are scheduled to return for service.

How it Works
The LifeSafer MMU is a breath analyzer linked to a camera. The handset features a display screen and keypad for easy navigation.

Note: This unit uses facial recognition technology to positively identify you as the correct user of the system. The picture taken of you when you picked up your unit was used to program the facial recognition feature. Make sure to remove hats, sunglasses and any other accessory item not worn when the picture was taken.

24-Hour Service Assistance

- We are always here to help you 24 hours a day.
- If you call after business hours, please listen carefully to the prompts which will allow you to leave a message, or speak to a Customer Care Agent
- The Customer Care Agent will try to alleviate the issue if possible

- To schedule an appointment
- To make a payment
- For assistance
- If you experience any issues with your unit
- If the unit is notifying you that it needs service
